QA3 Patient Trolley System

Designed following comprehensive research into patient trolley function and ergonomics
**The QA3 Patient Trolley:**
The QA3 version 3.0 Variable Height Patient Trolley: ideal for patient transport, examination and intubation in theatre and clinical areas. Designed for maximum patient comfort, the trolley is supremely manoeuvrable, compact, light weight and robust.

**The QA3 Emergency Trolley:**
A specially designed version of the QA3 for Accident & Emergency departments is available. This will include an X-ray translucent platform, a medirail and the K8 pressure care mattress. Optional features include a monitor shelf and a Venturi suction system.
Innovative technology – practically applied

Anetic Aid Limited has been designing, manufacturing and supplying operating theatre equipment to hospitals in the UK and overseas for over 30 years.

Renowned for innovation and high quality, the company believes in listening to customers and working closely with them to develop state-of-the-art products for a variety of clinical environments. It offers a broad range of equipment including surgical and patient transport trolley systems, tourniquets, theatre furniture, operation table accessories and surgical instruments.

With its commitment to using the latest technology and materials for maximum functionality, the company is proud to be launching the latest generation of its QA3 Patient Trolley System: ideal for patient transport, examination and intubation – and with a special model available for radiography in theatre and emergency areas – it is designed for maximum ease of use combined with superior patient comfort.

Its compact construction is lightweight yet robust, and its advanced steering system and ergonomically positioned pushing handles make it supremely manoeuvrable and easily guided by one person.

Wider than the previous version by 100mm (although the overall trolley width has only increased by 30mm), it descends to an exceptionally low height, while unique foldaway cotsides store away under the mattress footprint to give a virtually zero transfer gap.

The back rest is gas assisted for easy lifting and Trendelenburg (and reverse Trendelenburg) tilt can be operated instantly at any height from the head end.
Features of the QA3 Patient Trolley

The QA3 Version 3.0 Variable Height Patient Trolley: ideal for patient transport, examination and intubation in theatre and clinical areas.

- **Fixed transfusion pole** – innovative quick release safety locking mechanism, integrates into either head or foot end of cotsides for easy access and storage.
- **Vertically operated cotsides** – store away under the mattress giving a virtually zero transfer gap. Spring counterbalancing allows effortless ease of operation.
- **Hydraulic lift mechanism** – exceptional low height capability, adjusted by means of independently operating pedals located on both sides of the trolley.
- **Castors** – polyurethane tyres offer low rolling resistance for high manoeuvrability; 150mm castors fitted as standard, 200mm optional.
- **Pushing handles** – four ergonomically positioned pushing handles give supreme manoeuvrability either with the patient lying flat or sitting up.
- **Gas assisted backlift** – unique design, precision controlled, easy lift system for enhanced user and patient comfort.
- **Cylinder trough** – side loading for ease of access, suitable for a wide range of cylinder options including F, E or D.
- **Trendelenburg tilt** – extremely smooth and controlled mechanism, allows rapid Trendelenburg to be achieved even when trolley is at its lowest height.
- **5th wheel steering** – unique mechanism which ensures trolley is highly manoeuvrable and easily guided by one person.
A specially designed version of the QA3 for Accident & Emergency departments is available. This will include an X-ray translucent platform, a medirail and the K8 pressure care mattress.

**Patient comfort** – exceptional low height capability and store away cotsides allow easy mount/dismount particularly for elderly patients. Wider patient platform and pressure care mattress ensure maximum patient comfort. Improved ground clearance allows better access for patient hoists.

**X Ray translucent platform** – full length radio translucent platform suitable for digital or traditional plates.

**Infection control** – smooth moulded surfaces and acrylic capped vac formings enclose the trolley mechanics to minimise dirt traps. Anti-bacterial properties and innovative design ensure the product is easy to clean.

**2 fixed transfusion poles** – fitted as standard to emergency trolley

**Advanced braking** – exceptionally stable platform, advanced single bar braking system that allows all four castors to be braked simultaneously from either side of the trolley.

**K8 pressure care mattress** – manufactured from temperature-sensitive gel feel foam that moulds to the patient’s body shape, relieving pressure by distributing the load as evenly as possible. Developed with the flexible properties of lycra, this outer material is anti-microbacterial, water resistant, vapour permeable and latex free.
Optional Extras

200mm Castors*
Code: 21132

Emergency Venturi Suction System
Code: 21145

Foot End Stop / Monitor Shelf
Code: 21151

Grey Cotside Covers
Code: 21172
Child Print Cotside Covers
Code: 21173

Department Identification*
Code: 21175

*Denotes factory fitted option please specify at the time of ordering

### Standard features

- **Hydraulic lift mechanism** – exceptional low height capability
- **Vertically operated cotsides** – giving a virtually zero transfer gap
- **Trendelenburg tilt** – extremely smooth and controlled mechanism
- **Latest castor technology** – low rolling resistance for high manoeuvrability
- **5th wheel steering** – easily guided by one person
- **Pushing handles** – ergonomically positioned
- **Gas assisted backlift** – horizontal to near vertical
- **Advanced braking system** – exceptionally stable platform
- **Fixed transfusion pole** – innovative quick release
- **Cylinder trough** – side loading
- **K8 pressure care mattress** – body mould foam, anti-bacterial and latex free
- **Patient utility trays**
- **Rotating buffers** – at head and foot ends
- **Infection control** – anti-bacterial properties and smooth moulded surfaces

### Dimensions

- **Overall length:** 2130mm
- **Overall width:** 735mm
- **Height range (Non X-ray):** 475mm to 775mm (excluding mattress)
- **Height range (X-ray):** 520mm to 820mm (excluding mattress)
- **Height range (Endoscopy Non X-ray):** 525mm to 875mm (excluding mattress) *21138
- **Trolley weight:** 128kg (21110) 148kg (21120)
- **Maximum patient weight:** 320Kg (Please refer to user manual)
