

Cervical Rotating Biopsy Punch Product Specification

The Design Checklist

- Latest generation top jaw now stronger than Titanium, and 4x the strength of previous jaw
- Allows a Biopsy to be taken from a Hardened Cervix
- Low profile jaw provides better access to the transformation zone when migrating into the Endocervical Canal
- 360° rotation enables enhanced positioning and patient interaction
- Ensures a sharp, clean cut reducing Cervical trauma and patient discomfort
- Ergonomic handle designed for comfort
- Provides value-based benefits, improving procedure quality, patient safety, and overall cost savings
- Lightweight compared to alternatives
- Ideal for busy Colposcopy Clinics, with high-quality samples taken first-time
- Useful for increased HPV testing demands
- Single-use eliminates cross-contamination, inadequate samples, and repeat procedures
- UK manufactured
- Sterile, individually packed
